

William Buck

Agile staff locker storage with digital lock systems for professional services workplace

Client context

National accounting and advisory firm
Melbourne office transitioning to hot-desking
Staff no longer assigned permanent desks
Personal storage required during office attendance
Storage availability affects daily workflow and staff movement

The operational problem

Traditional desk-based storage no longer viable under hot-desking
Staff requiring secure personal storage during work hours
Lockers needed to remain available across changing daily occupancy
Manual key management creating avoidable administration
Storage infrastructure required to operate reliably with minimal oversight

Design & technical requirements

Electronic, keyless staff lockers suitable for frequent daily use
Reliable access control without reliance on physical keys
Automatic reset to ensure lockers are not left unavailable
Mains-powered operation to avoid battery replacement
Durable laminate finishes appropriate for office environments
Consistent design suitable for rollout across future projects

The response

Custom-manufactured timber laminate lockers with electronic PIN access
Automatic unlock function to prevent lockers being held unused
Mains-powered locking systems for low-maintenance operation
Precision manufacturing aligned with office fit-out requirements
Collaboration with the project partner to support design delivery and rollout

Outcomes

120 electronic staff lockers installed as part of the Melbourne office fit-out
Reliable locker availability supporting hot-desk use
Reduced administrative effort associated with key control
Improved staff experience through secure, predictable storage
Infrastructure suitable for ongoing use as work patterns evolve

Why this matters

Staff can attend the office without storage uncertainty
Hot-desking works as intended, without operational friction
Facilities teams avoid daily locker-related exceptions
Storage infrastructure supports flexible work quietly and reliably

Why AMD

Custom commercial furniture manufacturing capability
Experience delivering storage for professional services environments
Local production supporting quality, consistency, and refinement
Proven collaboration with specialist locker system integrators
